Course Description

Through this course, participants learn the steps in using the World Health Organization's ICD-10 as a coding tool. The course covers 26 modules, including the definition of ICD-10, benefits derived from its usage, history of its development, its elements and structures, the general guidelines for coding, and specific instructions for coding morbidity and mortality data.

Course Objectives:

1. State the reason for classifying diseases and operations/procedures;
2. Discuss the ICD-10 structure;
3. Discuss and explain the rules/guidelines on morbidity and mortality coding;
4. Code diseases using the International Clas-sification of Diseases, 10th Revision;
5. Discuss and explain the proper filing-up of the required reporting forms, e.g. medical certificates, death and fetal death certifi-cates, medical charts, etc;
6. Discuss data translated from Coded Data, e.g. Summary Statistics;
