**December 09-17, 2010**

“One – week intensive course in the laboratory  
isolation and identification of common bacterial  
pathogens from food and water.”

625 Pedro Gil St., Ermita Manila  
P.O. Box, EA-460, Manila  
Tel. No. 632-525-5874  
Fax No. 632-521-1394

  
**COURSE DESCRIPTION:**

The training course deals with the isolation and identification of the following organisms from food, beverages and water: *Enterobacteriaceae*, *Listeria monocytogenes*, *Vibrio cholerae*, and *Vibrio parahaemolyticus* and *Campylobacter spp.*

The course consists of lectures and laboratory sessions.

**COURSE CONTENT:**

The course provides hands-on experience on the following:

1. Proper processing of food, and water samples for testing.
2. Use of standard methods in the isolation and identification of pathogens from food.
3. Use of standard methods in the bacteriological analysis of water.
4. Proper interpretation and reporting of results of water analysis.

**INSTRUCTIONAL MODES:**

Short lectures, video presentation, demonstration and actual laboratory work will be used in the conduct of the training.

Food and water samples seeded with specific organisms will be used.
